PLEASE NOTE: SETS TO BE SHIPPED ABOUT APRIL 1976

Prepared by the National Library of Medicine (National Institutes of Health, DHEW), *Cumulated Index Medicus* is an annual compilation of citations to journal articles from the world's periodical biomedical literature indexed in the monthly *Index Medicus*. The citations within *CIM* are arranged by author and subject; *CIM* also includes Bibliography of Medical Reviews, Medical Subject Headings, and List of Journals Indexed. The 1975 *CIM* will contain approximately 220,000 entries.

*A price has been established in advance of publication to allow early processing of orders.* NOTE: The address to which orders should be sent is *Cumulated Index Medicus*, Public Documents Department, U.S. G.P.O., Washington, D.C. 20402.

Each set of eight clothbound books will be mailed in special cartons for maximum protection.

SOLD IN SETS ONLY \* \* \$192.00 PER SET—8 Books

PLEASE NOTE: Sets are scheduled to be mailed in April 1976

Remittance made payable to the Superintendent of Documents must accompany order.

## INTRODUCTION

*Selected References on Environmental Quality as it Relates to Health* is a product of MEDLARS (Medical Literature Analysis and Retrieval System), the National Library of Medicine's computer-based citation retrieval system that is used to compile and produce its publications. *Index Medicus* encompasses the literature of biomedicine broadly; other bibliographies cover special subject areas.

This bibliography cites selected articles from about 2,300 biomedical journals. Each monthly issue includes references cited in the monthly *Index Medicus* for the corresponding month.

The citations in *Selected References* are arranged under subject headings which appear in alphabetical order. The subheadings are arranged alphabetically within each subject heading. Citations are listed alphabetically by the abbreviation of the journal title within subheadings.

Subject headings are index terms selected by trained indexers from NLM's controlled vocabulary. *Medical Subject Headings (MeSH)*,\* as representing the content of the article. The indexer selects the most specific applicable subject headings. For example, a paper on dieldrin would appear under DIELDRIN, not under the broader INSECTICIDES. INSECTICIDES and other more general headings are used for general articles and for articles on those more specific concepts for which there are no individual headings in *MeSH*. If the desired references are not found under a specific term, the user should seek a more general term. (A convenient way to identify the appropriate general term is to browse in the hierarchic listing of *MeSH*). If the user wishes to search exhaustively for all citations on a general subject, he should scan the citations under both the general heading and all the more specific *MeSH* headings. For example, for citations on air pollution, one might scan AIR POLLUTION, and, additionally, DUST, SMOG, AUTOMOBILE EXHAUST, SMOKE, and AIR POLLUTION, RADIOACTIVE.

\* Medical Subject Headings, published as Part 2 of the January *Index Medicus* (available separately from Superintendent of Documents).

Subheadings are used to indicate a particular aspect of the subject. Subheadings appear in small capital letters indented under the subject.

Each bibliographic citation contains the following elements in order: title of the article in English (brackets indicate translated title); author (senior author if more than one); journal title abbreviation; volume number; inclusive pagination; date of issue; and an abbreviation indicating the language of the article if other than English. Foreign language articles containing an English abstract are so indicated. Review articles list the number of references in parentheses.

- Residue of organochlorine compounds and mercury in birds' eggs from the Niagara Peninsula, Ontario. Frank R, et al. *Arch Environ Contam Toxicol* 3(2):205-18, 1975  
Diazinon and chlorpyrifos residues in food after insecticidal treatment in rooms. Jackson MD, et al. *Bull Environ Contam Toxicol* 13(5):593-5, May 75  
Determination of linuron residue in soil. Khan SU, et al. *Bull Environ Contam Toxicol* 13(5):602-10, May 75  
The cumulation and disappearance of mirex residues. III. In eggs and tissues of hens fed two concentrations of the insecticide in their diet. Woodham DW, et al. *Bull Environ Contam Toxicol* 14(01):96-104, Jul 75  
Microdetermination of bioethanomethrin. George DA, et al. *J Assoc Off Anal Chem* 58(4):781-4, Jul 75  
A review of bromine determination in foods. Getzendaner ME. *J Assoc Off Anal Chem* 58(4):711-4, Jul 75  
Bioaccumulation of chlorinated paraffin residues in fish fed chlorowax 500C. Lombardo P, et al. *J Assoc Off Anal Chem* 58(4):707-10, Jul 75  
Residues in broiler chick tissues from low level feedings of seven chlorinated hydrocarbon insecticides. Onley JH, et al. *J Assoc Off Anal Chem* 58(4):785-92, Jul 75  
Determination of residues of dalapon in soil by gas chromatography of the 1-butyl ester. Cotterill EG. *J Chromatogr* 106(2):409-11, 26 Mar 75  
Coupling high-pressure liquid chromatography with a cholinesterase inhibition AutoAnalyzer for the determination of organophosphate and carbamate insecticide residues. Ramsteiner KA, et al. *J Chromatogr* 104(2):438-43, 12 Feb 75  
Analysis of HCB and BHC isomer residues in food. Szokolay A, et al. *J Chromatogr* 106(2):401-4, 26 Mar 75  
Systems for automated multiple pesticide residue analysis. McLeod HA. *J Chromatogr Sci* 13(7):302-7, Jul 75  
Residue analysis of DDT, malathion and kelthane on

## PESTICIDE RESIDUES
